

## SERVICE FOCUS

# Automatic Transaxle

## Planetary gears

Gear shifting is performed by combinations of the input gear, output gear and locked gears.

## Torque converter

Transmits and multiplies torque from the engine using transmission fluid as the medium.

## Transmission fluid

Transmission fluid is an integral part of your automatic transaxle function. Check with your Service Advisor for recommended service intervals for your Lexus vehicle.

## Differential

Performs three functions:

- Change the direction of the driving power.
- Final gear reduction.
- Allow drive wheels to rotate at different speeds when cornering.
