

## PRODUCT FOCUS

## Wiper Blades

### Why manufacturers wiper blades?

- All-Season Wiper Blades feature an aerodynamic steel frame and twin-rail refills for better performance.
- They offer exceptional strength and durability for the spring, summer and fall seasons.

### Features

- Designed using high-tensile strength steel and all natural rubber.
- The frames distribute wiper arm pressure evenly across the rubber edge of the blade.
- Easy to install with pre-assembled universal mount.

- They are engineered for a better fit on curved windshields.
- A precision cut rubber edge provides superior wiping action.

## **When to replace?**

- If the wipers are chattering, streaking or otherwise failing to wipe cleanly and consistently, you need new blades.
- Cracked, ripped or frayed wipers need to be replaced.

- Aerodynamic design contributes to a quiet, noise free ride.

Manufacturer's wiper blades have:

- Designed using high-tensile strength steel and all natural rubber.
- Durable all steel frame.
- Easy to install with pre-attached adapter for most vehicles.
- Streak-free rubber edge for a smooth wipe.
